CHAPTER -4: INTRODUCTION OF CONTROL PANEL (DETERGENT DRAWER)

33

You can use the liquid level determination plate when you want to wash your laundry with liquid detergent. You can use your liquid detergents in all programs without prewashing. Place the liquid detergent apparatus in the second compartment (which is available inside the machine) of the detergent drawer (*) and set the detergent amount. (Use the recommended amount of liquid detergent by detergent producers). Do not exceed the MAX level, use only for liquid detergent, do not use this apparatus for powder detergent and take it out.)

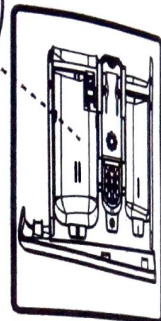

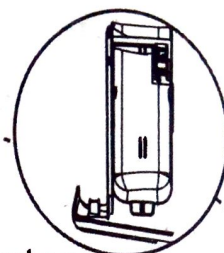

(*) Machinery specifications may vary depending on the product purchased.

SECTIONS

Main wash detergent compartment:

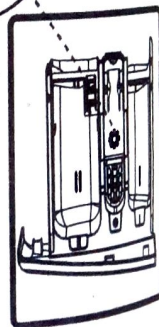

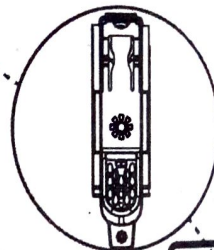

In this compartment, only materials like detergent (liquid or powder), lime preventer and such can be used.

You can find the liquid detergent apparatus inside your machine at first installation. (*)

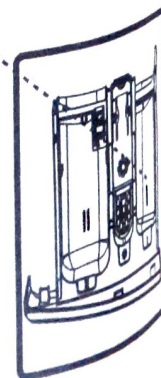

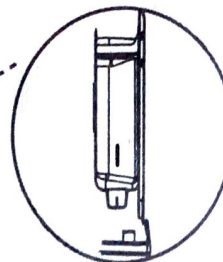

Fabric conditioner, starch, detergent compartment:

You can use softener for your laundry (recommended amount and type by the producer is recommended). Sometimes the fabric conditioners you use for your laundry may remain in this compartment. The reason for this is that the conditioner is not viscous. To prevent this situation, more viscous liquid softeners are recommended to be used or the softener could be thinned and then used.

Pre-wash detergent compartment:

This compartment must only be used when the pre-wash feature is selected. Pre-wash feature is recommended for very dirty laundry.

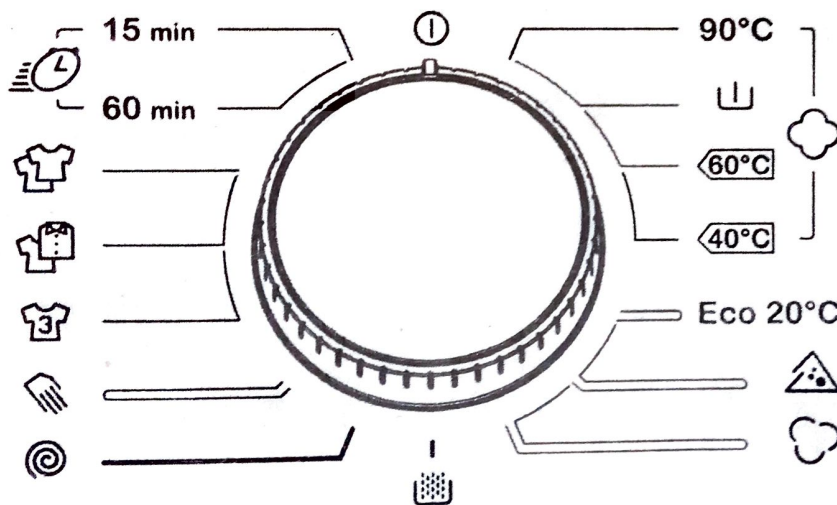

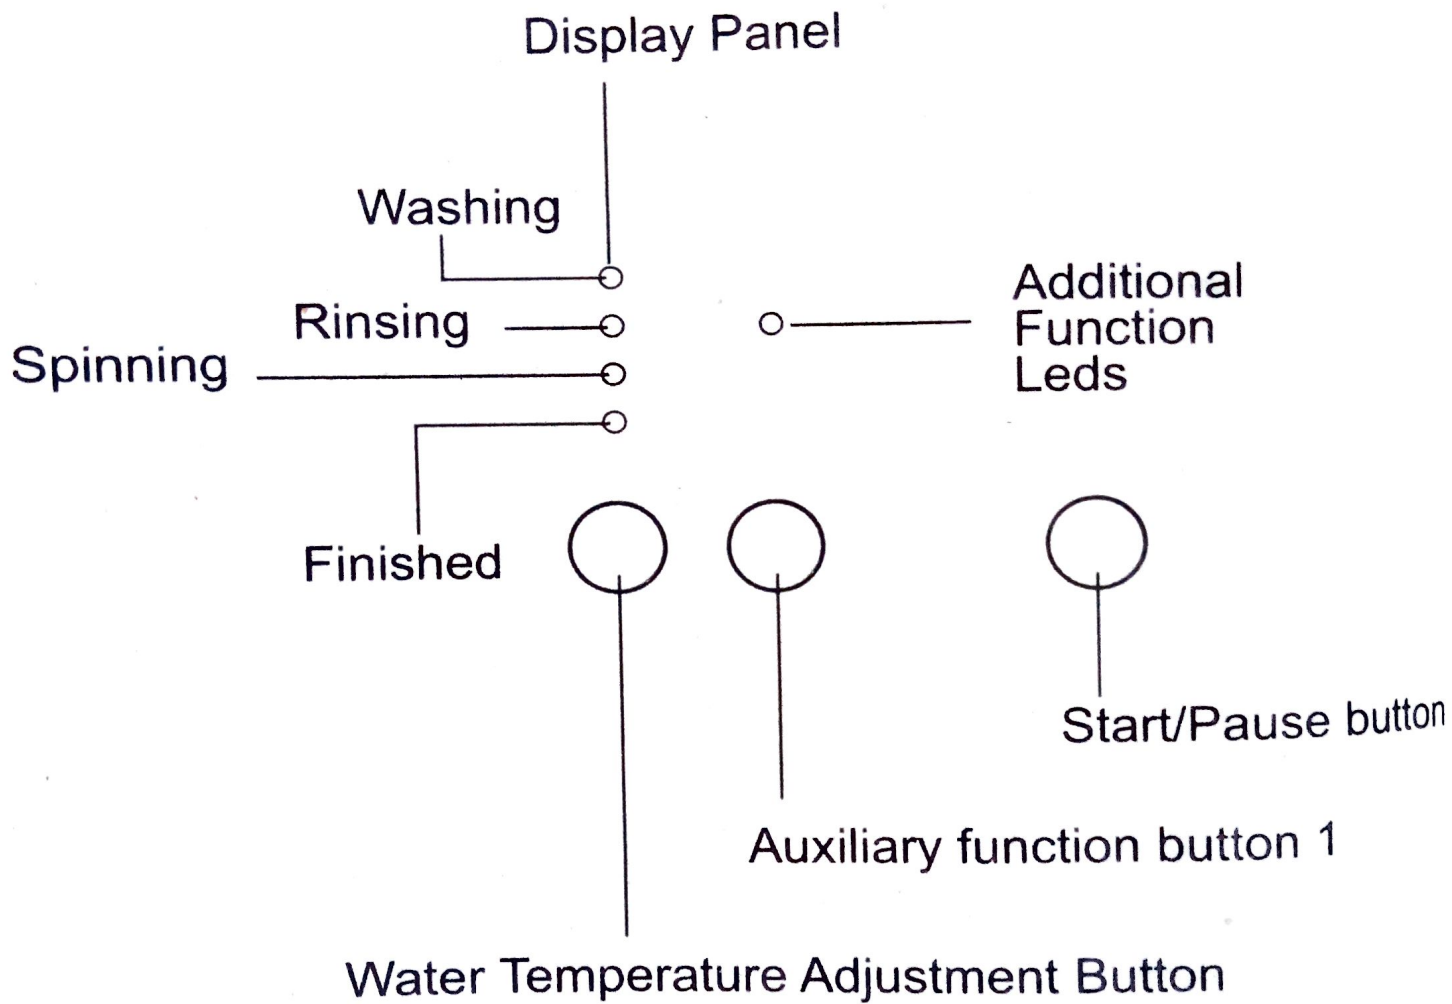

(*) Machinery specifications may vary depending on the product purchased.

CHAPTER -4: INTRODUCTION OF CONTROL PANEL (PROGRAM KNOB)

35

- You can select the programme you want to wash your laundry in through programme knob.
- You may set the programme selection operation by rotating the programme knob in both directions.
- Ensure that the programme knob is exactly on the programme you want to select.

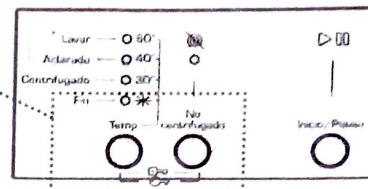

From the function leds of your machine, the washing water temperature of your machine, the auxiliary functions you have selected and the stage of the programme you are running on your machine. (⏻ pre wash / wash state, 🚰 rinsing stage, @ spinning stage).

Furthermore, electronic display will warn you by means of led combinations that will turn on its display when a fault occurs on your machine and notify you of the completion of the washing programme by revealing expression of "Finished" on the display as soon as the washing programme you have selected has finished as well.

AUXILIARY FUNCTIONS

Before starting the programme, you can optionally select an auxiliary function.

- Press on the button of auxiliary function you would like to select.
- If auxiliary function symbol on electronic display flashes continuously, the auxiliary function you have selected will be activated.
- If auxiliary function symbol on electronic display blinks, the auxiliary function you have selected will not be activated.

Reason for non-activation:

- The auxiliary function you want to use in the washing programme you have selected is not applicable.
- Your machine has passed over the stage, during which the auxiliary function you would like to select would be implemented.
- It is not compatible with an auxiliary function you have selected previously.

HALF-LOAD DETECTION SYSTEM

Your machine features a half-load detection system.

In case you put approximately half or less amount of laundries of maximum laundry capacity in your machine, your machine will run so as to save washing time, water consumption and energy in some programmes. When the half-load function is active, the machine can complete the programme you have set in a shorter time.

1. Temperature selection

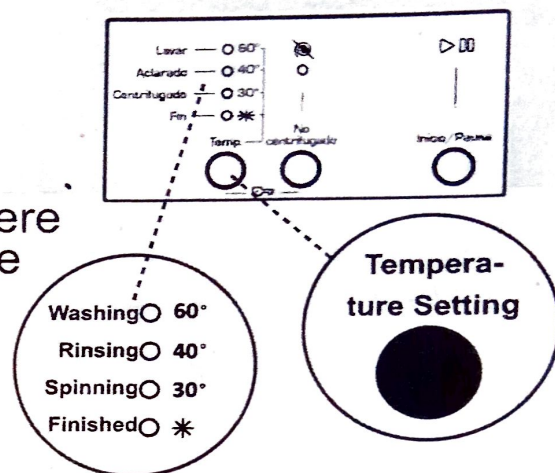

You can select the washing water temperature with the washing water temperature adjustment button.

When you select a new programme, there won't be any display on the temperature adjustment leds on the display panel. When you press the temperature adjustment button, the max. temperature value of the programme you have selected shall appear on the led display panel.

You can gradually decrease the washing water temperature between the maximum washing water temperature of the selected programme and cold washing * selections by pressing temperature adjustment button.

If you have missed the washing water temperature you wanted, you can return to the intended temperature by continuously pressing the washing water temperature adjustment button.

NOTE: When 90° programme is selected, the max. temperature value of the selected programme is not displayed on the display panel. When the temperature value is decreased to 60°, 40°, 30°, * (cold washing) temperature levels by pressing the temperature adjustment button, the decreased temperature value is displayed on the display panel.

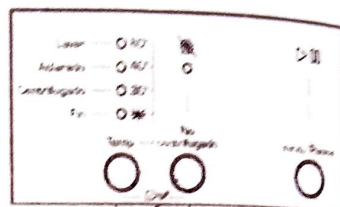

CHAPTER -5: PRELIMINARY PREPARATION FOR LAUNDERING AUXILIARY FUNCTIONS

46

2- No Spin(*)

If you don't want to perform spinning on your laundry, you can use this auxiliary function.

By pushing the no spin button, button,  when the led light of the symbol turns on.

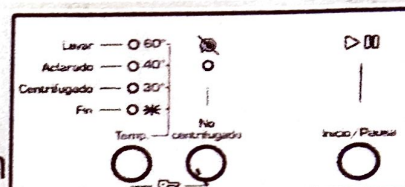

(*) Model Dependant

3- Anti- Allergic(*)

In the programmes where this auxiliary function is active, you may have your machine perform an Extra rinse operation on your laundries prior to latest rinsing operation

You may make the programme active by pressing the anti-allergic auxiliary function button when the led light of the  symbol turns on.

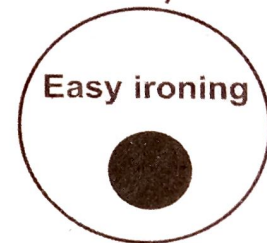

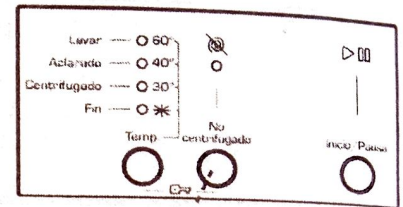

(*) Model Dependant

4- Easy ironing(*)

You can enable your laundries to be taken out less wrinkled as the washing operation is completed by employing this auxiliary function.

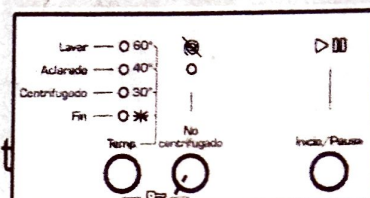

You may make the programme active by pressing the easy ironing auxiliary function button when the led light of the  symbol turns on.

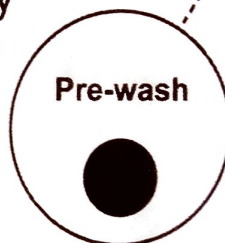

(*) Model Dependant

5- Pre-Wash(*)

You can expose your very dirty laundries to prewashing operation prior to main washing by using this additional function. When using this function, you should put detergent in front washing compartment of the detergent drawer.

You may make the programme active by pressing the pre wash auxiliary function button when the led light of the  symbol turns on.

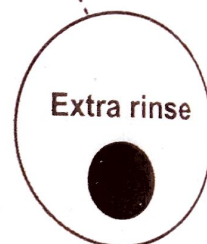

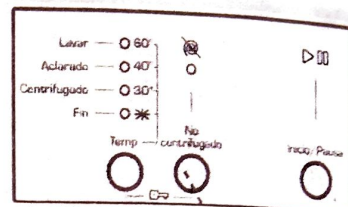

(*) Model Dependant

6- Extra Rinse(*)

You can make additional rinse operation on your laundry by using this additional function.

You may make the programme active by pressing the Extra rinse auxiliary function button when the led light of the  symbol turns on.

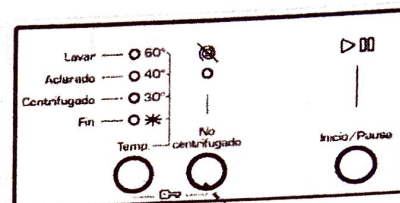

(*) Model Dependant

7- Cold Wash(*)

You can use this auxiliary function when you want to wash your laundry with cold water (tap water).

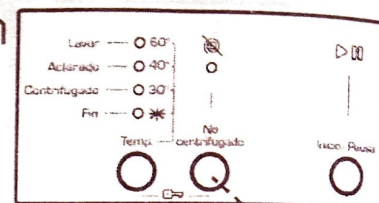

You may make the programme active by pressing the cold wash auxiliary function button when the led light of the * symbol turns on.

(*) Model Dependant

8- Rapid Wash(*)

By using this auxiliary function, you can wash your laundry in a shorter time and spending less energy and water. (It is advised that laundry that is less than half the capacity of the selected washing programme is placed.)

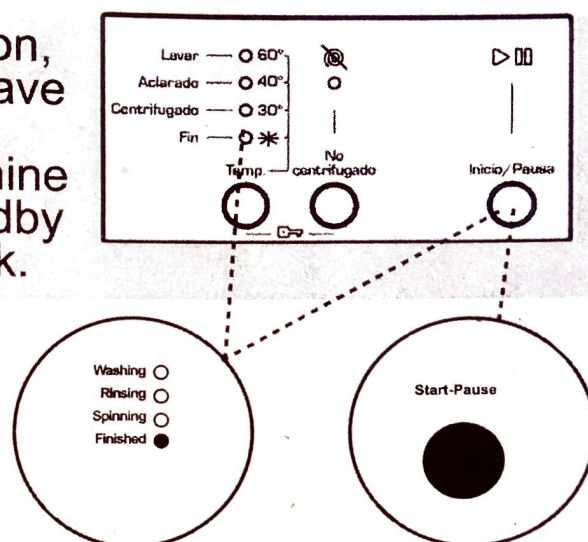

Rapid
wash

You may make the programme active by pressing the rapid wash auxiliary function button when the led light of the  symbol turns on.

NOTE: In case you put half or less than half of the laundry capacity of the washing programme you have selected in your machine, your machine will detect this thanks to automotive half-load detection system and the programme you have selected will wash your laundries in a shorter time to consume less energy and water. When your machine detects half load, the led of the  symbol shall turn on automatically.

Start/Pause button

By pressing on the Start/Pause button, you may start the programme you have selected or suspend a running programme. If you switch your machine to the standby mode, the Start/Standby led on the electronic display will blink.

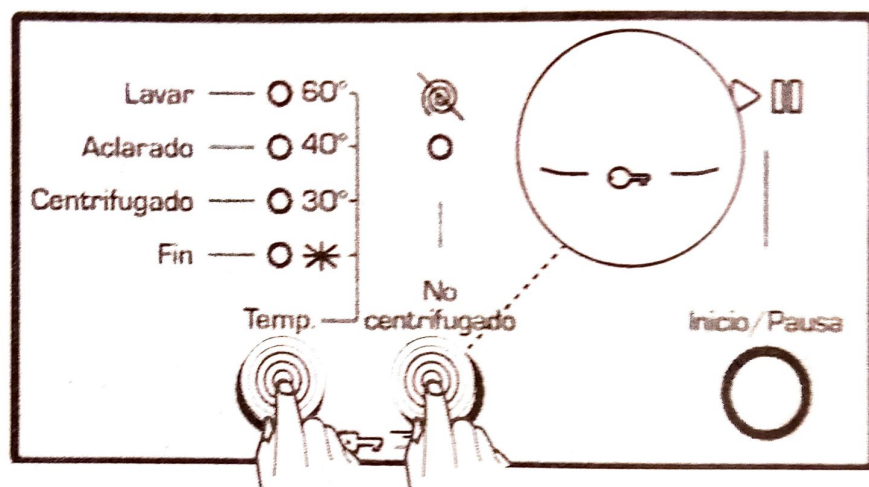

CHAPTER -5: PRELIMINARY PREPARATION FOR LAUNDERING (CHILD LOCK)

54

To avoid programme flow from being affected if programme buttons are pressed or programme button is turned when performing washing operation in your machine, child lock is available.

Child lock will be activated in case pressed on both auxiliary functions 1 and 2 at the same time for more than 3 seconds. You can see the auxiliary function leds on the display when activated.

If pressed any button while child lock is active, the Additional Function Leds will blink on the display.

If while the child lock is engaged and any programme is running, the programme knob is switched to the CANCEL position and another programme is selected, the programme previously selected continues from where it left.

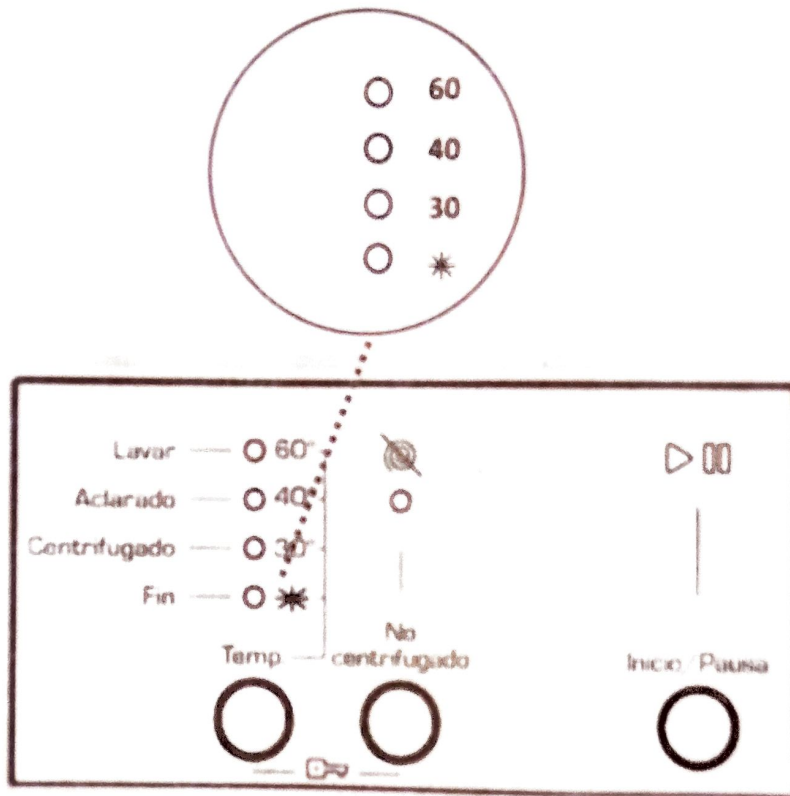

To deactivate it, it will be sufficient to press on the same buttons for more than 3 seconds. When the child lock is deactivated, the Additional Function Leds will blink on the display.

If you want to cancel any programme running:

- 1- Switch the programme knob to "CANCEL" position.
- 2- Your machine will stop the washing operation and the programme will be cancelled.
- 3- To get rid of the water accumulated in the machine switch the programme knob to any programme.
- 4- Your machine will perform the necessary discharge operation and cancel the programme.
- 5- You can run your machine by selecting a new programme.

Your machine will stop by itself as soon as the programme you have selected finishes.

- End led will blink on the display panel.

- You can open the machine's door and remove the laundry.
- Leave the door of your machine open to allow the inner part of your machine to dry after removing your laundries.
- Switch the programme knob to CANCEL position.
- Unplug your machine.
- Turn the water faucet off.

COTTON 90°

Washing temperature (°C)	90°
Maximum dry laundry amount (kg)	5,0
Detergent compartment	2
Programme duration (Min.)	191
Laundry type / Descriptions	Very dirty, cotton and flax textiles. (Underwears, linen, tablecloth, towel (maximum 2,5 kg), bedclothes, etc.

Pre-Wash Cotton

Washing temperature (°C)	60°
Maximum dry laundry amount (kg)	5,0
Detergent compartment	1&2
Programme duration	160
Laundry type / Descriptions	Dirty cotton and flax textiles. (Underwears, linen, tablecloth, towel (maximum 2,5 kg), bedclothes, etc.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

COTTON ECO 60 C°

Washing temperature (°C)	60°
Maximum dry laundry amount (kg)	5,0
Detergent compartment	2
Programme duration (Min.)	190
Laundry type / Descriptions	Dirty cotton and flax textiles. (Underwears, linen, tablecloth, towel (maximum 2,5 kg), bedclothes, etc.

COTTON 40 C°

Washing temperature (°C)	40°
Maximum dry laundry amount (kg)	5,0
Detergent compartment	2
Programme duration (Min.)	180
Laundry type / Descriptions	Dirty cotton and flax textiles. (Underwears, linen, tablecloth, towel (maximum 2,5 kg), bedclothes, etc.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

ECO 20°

Washing temperature (°C)	20°
Maximum dry laundry amount (kg)	2,5
Detergent compartment	2
Programme duration (Min.)	98
Laundry type / Descriptions	Less dirty, cotton and linen textiles. (Underwear, bedsheet, tablecloth, towel (max. 2 kg) bedcloth, etc.)

EASY CARE

Washing temperature (°C)	40°
Maximum dry laundry amount (kg)	3,0
Detergent compartment	2
Programme duration (Min.)	89
Laundry type / Descriptions	Very dirty or synthetic-mixed textiles. (Nylon socks, shirts, blouses, synthetic- including trousers etc.)

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

WOOL

Washing temperature (°C)	30°
Maximum dry laundry amount (kg)	2,0
Detergent compartment	2
Programme duration	40
Laundry type / Descriptions	Woollen laundries with machine wash labels.

RINSING

Yıkama sıcaklığı (°C)	-
Maximum dry laundry amount (kg)	5,0
Detergent compartment	-
Programme duration	36
Laundry type / Descriptions	If you want to additionally rinse your laundries upon completion of washing operation, you may use this programme for any kind of laundries.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

SPINNING

Washing temperature (°C)	-
Maximum dry laundry amount (kg)	5,0
Detergent compartment	-
Programme duration	15
Laundry type / Descriptions	If you want to additionally Spinning your laundries upon completion of washing operation, you may use this programme for any kind of laundries.

SENSITIVE/HAND WASH

Washing temperature (°C)	30°
Maximum dry laundry amount (kg)	2,0
Detergent compartment	2
Programme duration	91
Laundry type / Descriptions	Laundry recommended for hand wash or sensitive laundry.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

SPORTS WEAR

Washing temperature (°C)	30°
Maximum dry laundry amount (kg)	3,0
Detergent compartment	2
Programme duration	80
Laundry type / Descriptions	Sportswear.

MIXED

Washing temperature (°C)	30°
Maximum dry laundry amount (kg)	3,0
Detergent compartment	2
Programme duration	87
Laundry type / Descrip-	Dirty cotton, synthetics, colour and flax textiles can be washed together.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

BLOUSES / SHIRTS

Washing temperature (°C)	60°
Maximum dry laundry amount (kg)	3,0
Detergent compartment	2
Programme duration	106
Laundry type / Descriptions	Dirty cotton, synthetic and synthetic-mixed shirts and blouses can be washed together.

DAILY 60 min.

Washing temperature (°C)	60°
Maximum dry laundry amount (kg)	2,0
Detergent compartment	2
Programme duration	60
Laundry type / Descrip-	You can wash your dirty cotton, colour and flax textiles at 60°C in 60 minutes.

If you have the rapid washing auxiliary function in your machine, then if you put 2 kg or less laundry in your machine, your machine will automatically wash for laundry for 30 minutes.

NOTE: PROGRAM DURATION MIGHT CHANGE ACCORDING TO THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

RAPID 15 min.

Washing temperature (°C)	30°
Maximum dry laundry amount (kg)	2,0
Detergent compartment	2
Programme duration	15
Laundry type / Descriptions	You can wash your slightly stained, cotton, colured and flax textile within only 15 minutes.

NOTE: As the washing period is short, less amount of detergent is required to be used compared to other programmes. The programme period will increase if your machine detects instable loading.
