

Tips & Rules

Dear holiday house guests,

welcome to our holiday home in Silves. Below you will find some tips and rules that contribute to a carefree holiday in our house. Due to the age of the city and our house, there are some special features that should be considered.

VENTILATION

Our old town house from 1857 needs a good ventilation!

Cross ventilation occurs when windows (especially in the bedroom) and the door to the terrace are opened frequently (use stopper). When you are absent and at night, you should always close the fly screen roller blind in the bedroom and on the patio door when ventilating in order to prevent insects and other animals from entering.

WATER

Since the water pipes were renewed in the house, the water in the bathroom and in the kitchen can be drunk without doubts.

BATHROOM

The sewer system was also renewed. It is therefore possible to dispose toilet paper in normal quantities in the WC (not typical in Portuguese old houses) - eventually rinse 2x. Not-water-soluble materials such as bandages or tampons, please DO NOT put in the toilet! It is a bath bucket available.

The floor of the shower unfortunately has a deepening. After showering some small amount of water remains here. Simply push it with the foot or the puller briefly towards the drain, so that the floor can dry.

FLOOR

The historic "Santa Catarina" tiles are sealed. Nevertheless, we kindly ask you to remove stains immediately with water or soapy water before they leave any residues.

TERRACE

Keep in mind that the weather can change quickly during your absence and therefore secure all items against wind and rain!

The easy-care plants on the terrace and in front of the house are grateful if they get some water in prolonged drought!

GRILL ON THE TERRACE

Please do not use the grill in strong winds! (Flying sparks)
The ashes must be cool before disposal.

MEALS ON THE TERRACE

The stairs are partly very steep. Please always hold on tight and use the wicker basket in the kitchen for transporting dishes and food.

SMOKING

Please only on the terrace! Here you will find a "wind ashtray".

WIRELESS INTERNET ACCESS

You have internet in the house and on the terrace. In the bedroom, the reception is weak due to the traditionally thick walls. This is conducive to your sleep! If you would still like to surf in the bedroom, you will find a repeater on the right under the window, which you can simply turn on in this case.

WASHING

Ana has certainly shown you where the washing machine "hides" on the terrace.

We attach great importance to "fragrance-free", unperfumed detergents. We also do not use fabric softener (chemical residues in the laundry).

If you hang your laundry to dry, please make sure that no objects fall into the gutter below. If it happens, please tell Ana.

STOVE AND COOKING PLATE

Please make sure that the stove and hotplates are always switched off when leaving the kitchen (also towards the terrace).

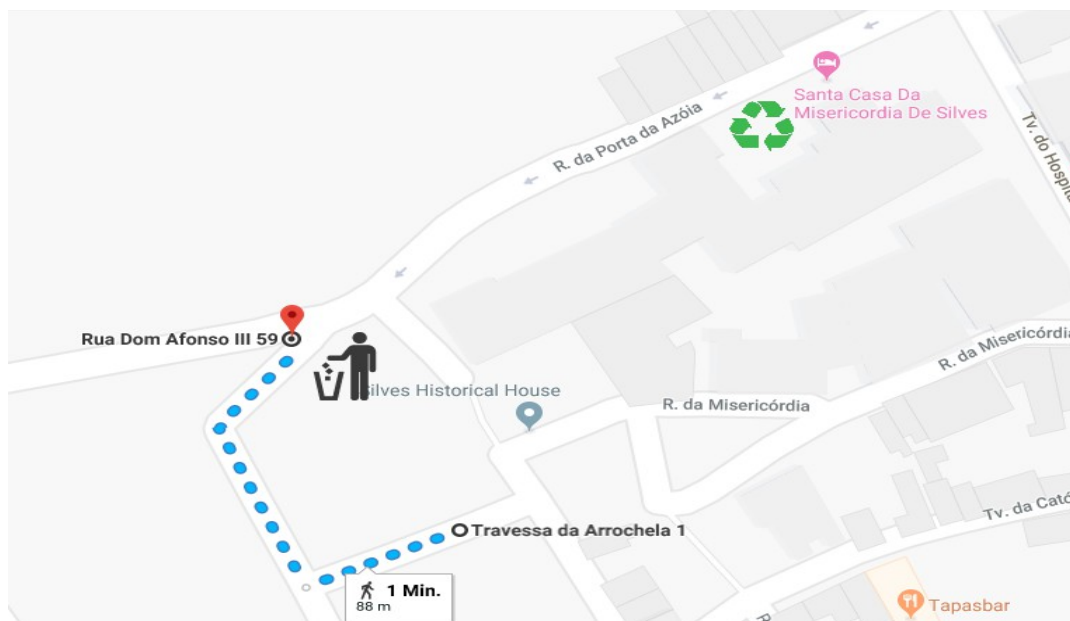

The ceramic hob must NOT be cleaned with sharp or abrasive cleaning or cleaning agents.

WINDOWS, SHUTTERS AND DOOR

When leaving the house, lock securely all windows and front door. The window shutters can remain open.

WASTE DISPOSAL

The household waste is disposed of centrally in the green bins at Rua Alfonso III. Waste separation is possible in front of "Santa Casa Da Misericordia De Silves".

For questions about the operation of the devices, take a look at the page "[Manuals](#)".

Otherwise, just ask Ana!

Have a nice stay! Family Kleiner

P.S. If you have any tips for us or you notice any shortcomings, let us know.
We are grateful for feedback!
